

Corporate Event Solutions and Tech Event Ideas

Innovative Corporate Event Solutions

Robot Event Assistant

- Artificial Intelligent Systems & Robotic systems enhancing business-customer interactions in the digital era
- Registration feature: QR based + form on robot display with up to 8 custom fields
- Award delivery: Winner name display & navigation on stage
- Photo capture with sharing on a client shared drive
- Video playback, collateral download, and marketing promotions during networking events

360 Video Booth

- Slow motion 360° video capture from all angles with a rotating camera arm
- Unlimited videos within 3 hours
- Output options: Slow Motion and Boomerang
- Instant sharing options: WhatsApp, Airdrop, SMS, Email, QR scan
- Customization: Overlay, Background Music (BGM), Home Screen, and fun props including wigs, hats, glasses, placards, super money gun, bubble gun, and color papers
- Includes red carpet, queue managers, and technicians
- URL access for viewing and downloading soft copies

3D Holographic Fan Displays

- Attractive 3D Illusion Effects

- Multiple format options: Table top (15mm + speaker), Table top (33mm), Wall/Frame Mount (65mm + matrix), Backpack Display (45mm)

Pedal Pulse

- Interactive stationary cycling game to beat a track or compete with others
- Custom UI templates with brand space
- Real-time monitoring of speed, distance covered, max speed
- Optional audio support on themes
- Final score reports with options to share score and selfies on WhatsApp or social media

Custom Themed Photobooths

- Variety of photobooths enhanced with AR to AI technology
- Types: Word Art Photobooth, GIF Photobooth, Toon Me Photobooth, Green Screen Photobooth
- Features: Instant print, WhatsApp sharing, custom templates, and branding space

Paparazzi Photo-Booth

- Automated photo booth with motion sensors
- Timelapse outputs for event coverage

Gesture / Motion Control Systems

- Gesture-controlled interactive solutions based on body movement and activity

Computer Vision Enabled Systems

- Visitor counting, segmentation, pose estimation, and detection
- Track visitors and identify interest points for stalls/products

- Real-time detection and classification of people and objects
- Dashboard visualization of analytical data
- Interactive pose estimation games

Interactive Touch Displays

- Custom touch screen UI interfaces with multipage navigation
- Centralized server control

Experience and Custom Acts

Science and Robotics Workshops

- Fun, educational activities for kids 8 years and above
- Circuit workshop, robot car building, physics workshop, drone mechanics, and virtual simulator experience

Special Project Highlight

- ICC World Cup 2024 – Mini Truck
- Custom-built 1:5 scale Scania RC vehicle designed to deliver cricket balls during matches
- RC controlled with payload capacity up to 150kgs

Additional Tech Event Ideas

Drone-Based Event Experiences

- Aerial product launches and documentaries using UAVs
- Autonomous land surveys and aerial surveillance
- Search and Rescue (SAR) operations support with heavy-lift surveillance drones

- Infra-red aerial riot surveillance
- Interactive party experiences featuring drone formations and light shows

Augmented Reality and AI-Driven Engagements

- AI-powered marketing promotions integrated in robotic assistants and photo booths
- Augmented reality games and interactive storytelling experiences
- Virtual product try-ons and demos using AR technology
- AI visitor analytics for personalized event interactions

Enhanced Networking Tech

- Digital business card exchanges via QR and robot platforms
- Interactive touch screens for brand engagement and content sharing
- Real-time social media integration and live digital walls

These cutting-edge event solutions combine technology, interactivity, and entertainment to create memorable and effective corporate events. Leveraging robotics, drones, AR/AI, and computer vision, businesses can enhance engagement, gather valuable data, and ensure a dynamic event experience for all attendees.
